Preface to the First Edition

It is a matter of great rejoice to write the preface of the first edition of **"A textbook of Pathophysiology"**.

Pathophysiology is a connecting bridge between anatomy, physiology and pharmacology. Adequate insight of pathophysiology will be helpful for better understanding of pharmacology.

This book will be useful from the academic point of view, specially for pharmacy students, as this subject has recently been introduced. We have tried to give maximum recent and updated information and also made a sincere effort to create a perfect mixture of a reference and examination oriented book.

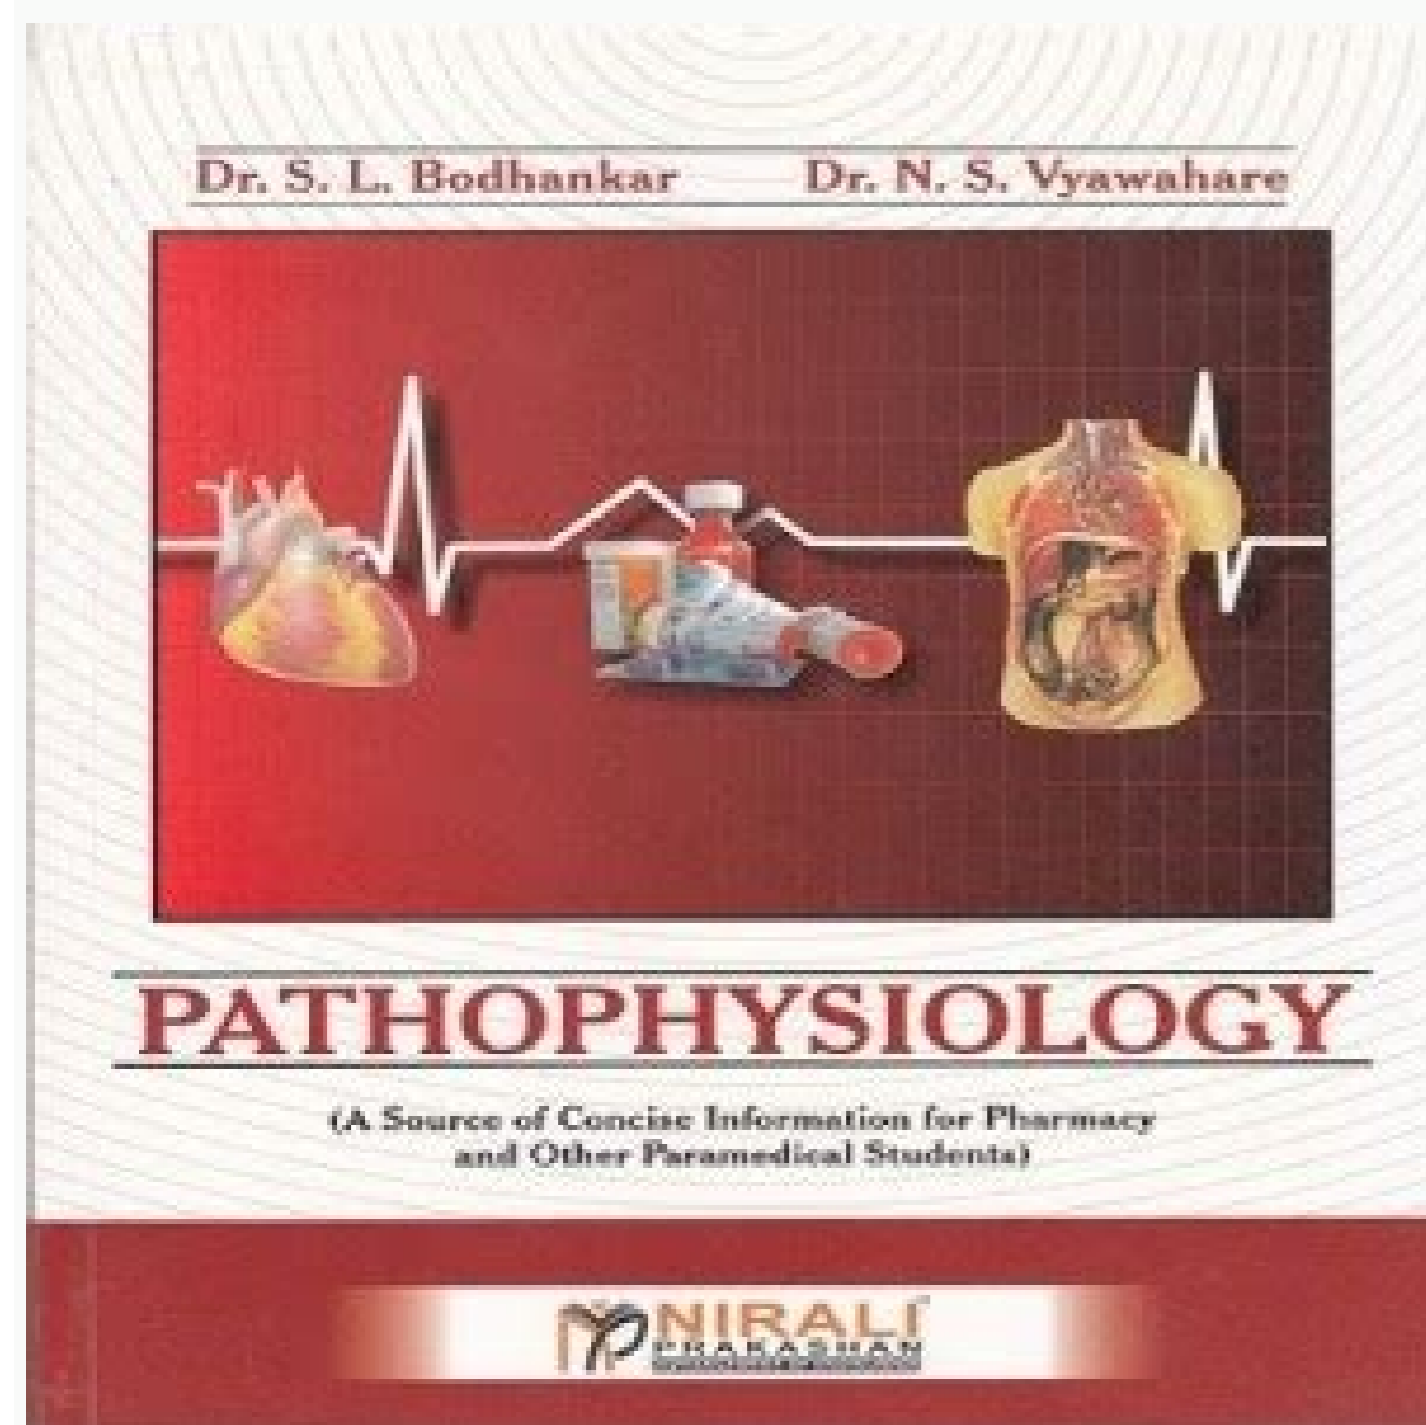

Keeping this in view, it is our endeavour to provide a comprehensive text of pathophysiology through lucid language covering diagrams, flow charts and tables wherever necessary. Additional features consists of a brief introduction to the system along with a Question Bank and Set of University Question Papers.

Although we have tried to give the best available information, however, continuous research, clinical examinations, individual sensitivity may show change in effectiveness of therapy and hence treatment of any nature should not be substituted by our book.

We will be grateful to all the readers who finally judge the quality of this book and feedback for the same is welcomed.
